Summary

I'm a dedicated student at ITER College, SOA University, passionate about Java and web development. Through my education, I've gained proficiency in Java, including object-oriented programming and data structures. Additionally, I've explored web development, mastering HTML, CSS, JavaScript. I've applied these skills in real-world projects, developing interactive web applications. I possess a keen ability for rapid assimilation and adeptly adjusting to dynamic circumstances, allowing me to discern and respond promptly and effectively. I'm eager to connect with professionals and explore opportunities in the ever-evolving world of technology.
